Formula

$$\left(\frac{\text{stakes per user}}{\text{stakes overall}} \right) \times \text{reserved amount } \text{€}$$

Example 1:

>10,000 followers: (20 stakes x 1,000 shares per week x 8 weeks) = 160,000 stakes;

13,700,000 stakes over all;

$$(160,000/13,700,000) \times 50,000 \text{ €} = 467 \text{ €} (\approx 1,250 \text{ USD})$$

Example 2:

500-999 followers: (10 stakes x 200 shares per week x 8 weeks)= 16,000 stakes;

13,700,000 stakes over all;

$$(16,000/13,700,000) \times 50,000 \text{ €} = 47 \text{ €} (\approx 125 \text{ USD})$$
